Customer Reviews

This is an excellent history of helicopter development and applications during the 1948-1998 period. McGuire, a Columbia University School of Journalism honors graduate, has done a first rate job in presenting both the challenges and opportunities facing the international helicopter industry during a time of major growth, in terms of helicopter applications, and change, in terms of helicopter design, structures and materials . The book is a "must read" for anyone who follows the rotary wing industry, whether he or she is a member of academia, industry or government, aeronautics engineer, pilot or simply a helicopter enthusiastSubmitted by M.E. Rhett Flater, former executive director of the American Helicopter Society International (1991-2011)..
