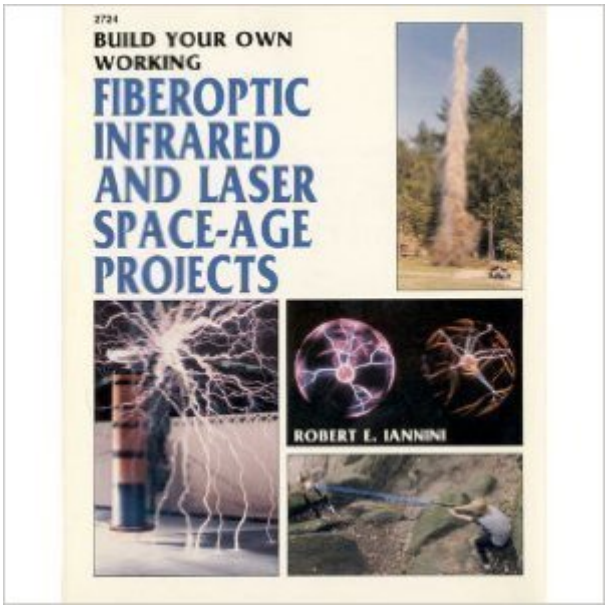
Build Your Own Working Fiberoptic Infrared And Laser Space-Age Projects



Synopsis

Now electronics hobbyists can put aside ordinary, everyday electronics projects and start building something really exciting. They can probe the possibilities of high technology-lasers, fibroptics, and high-voltage electrical devices; discover the challenge and the satisfaction of building sophisticated and practical electonic and scientific devices for a fraction of the comparable commercial cost. And they can do it all far more easily than they ever thought possible.

Book Information

Paperback: 288 pages

Publisher: Tab Books (February 1987)

Language: English

ISBN-10: 0830627243

ISBN-13: 978-0830627240

Product Dimensions: 0.8 x 7.5 x 9.5 inches

Shipping Weight: 1.1 pounds

Average Customer Review: 3.8 out of 5 starsÂ Â See all reviewsÂ (4 customer reviews)

Customer Reviews

If you want to know how to build a laser,or are looking for a hot project, than here’s your book. I enjoyed this book very much, because of the oppertunities it gives you to "go" with. Find a project, then we’ll show you how to build, is the way this book is setup. Written user friendly!

Descriptions of projects are very brief and obscure. To get close to building any of these projects, you need to already have a good understanding of how it works. I would not suggest this book for anyone.

Because my husband is over the moon that he finally has the book that he could not find anywhere in Mandurah Western Australia.

If you want to win a science fair or if you just want to have a laser scope for your rifle, this is the

book to get. It is also helpful in building the most impressive laser tag gun ever, if I had the technology money and knowhow. I just want a review to raise my rank.

Build Your Own Working Fiberoptic Infrared and Laser Space-Age Projects Technical Description of the Infrared Laser used on the World Trade Center 9/11 DIY Woodworking Projects: 20 Easy Woodworking Projects For Beginners: (Woodworking Projects to Make with Your Family, Making Fun and Creative Projects, ... projects, wooden toy plans, wooden ships) Laser Space Communications (Artech House Space Technology and Applications) How to Plan, Contract, and Build Your Own Home, Fifth Edition: Green Edition (How to Plan, Contract & Build Your Own Home) ISO 11146-1:2005, Lasers and laser-related equipment - Test methods for laser beam widths, divergence angles and beam propagation ratios - Part 1: Stigmatic and simple astigmatic beams Handbook of Laser Wavelengths (Laser & Optical Science & Technology) Woodworking: Woodworking Projects and Plans for Beginners: Step by Step to Start Your Own Woodworking Projects Today (WoodWorking, Woodworking Projects, Beginners, Step by Step) Homesteading for Beginners: Self-sufficiency guide, Grow your own food, Repair your own home, Raising Livestock and Generating your own Energy (Homesteading, ...
